

SECURITY POLICY

GasLog LNG Services Ltd., being involved in the operation and management of vessels providing worldwide transportation of cargoes by sea, recognizes the need to apply standards of security on the managed vessels and within the office environment.

Specifically, GasLog LNG Services will:

- Ensure that the Company Security Officer and the Master / Ship Security Officer are given the necessary support to fulfill their duties and responsibilities in accordance with SOLAS XI-2 and the ISPS Code.
- Maintain a global security situation awareness
- Provide for security protective practices and procedures in vessel and shore operations with safeguards against identified risk.
- Conduct assessments of possible security threats to vessels and shore establishments
- Promote sustainable global improvement by participating and communicating security intelligence with other interested parties.
- Comply with all applicable security laws and regulations and cooperate fully with relevant enforcement agencies
- Receive and evaluate security briefs at high risk ports and in high risk areas
- Ensure that contingency planning is in place to provide appropriate responses to security threats
